

Value of GGOS

- Representation of geodesy to decision makers, educators and public
- Interface to GEO, GEOSS, IGOS-P, intergovernmental and international bodies, etc.
- Advocacy for geodetic infrastructure improvement with funding sources
- Development of new funding model for infrastructure
- Development and promotion of Earth science rationale and new geodetic products
- Coordination of user feedback for product improvement and development
- Unification of geometry/rotation and gravity
- Operational forum among Services
- Additional resources provided by and through Bureaus
